

PROJECT REPORT

1. Cover Page

FRESHBITE – ONLINE FOOD ORDERING WEBSITE

Project Report

Submitted by:

BANDI INDRAVATHI

Course/Department:

COMPUTER SCIENCE AND ENGINEERING

Internship:

Web Development Internship

Technologies Used:

HTML5, CSS3, JavaScript

Academic/Project Year:

2026

2. Introduction

Write a short description of your project.

Example:

FreshBite is a front-end online food ordering website developed using HTML5, CSS3, and JavaScript. The website provides users with an easy way to browse restaurants, view food items, add products to a shopping cart, and proceed through the checkout process. The project focuses on creating a clean, responsive, and user-friendly food ordering experience.

3. Objective

Explain **why you created the project**.

For example:

- To develop an online food ordering website.
 - To provide a simple interface for browsing restaurants and food.
 - To implement shopping cart functionality.
 - To create a checkout and order process.
 - To practice HTML, CSS, and JavaScript.
 - To develop a responsive website.
-

4. Technologies Used

Create a small table:

Technology	Purpose
HTML5	Website structure
CSS3	Styling and responsive design
JavaScript	Interactivity and functionality
JavaScript Arrays/Objects	Storing food and cart data
Browser Storage	Storing cart/user data if implemented

5. Features

Explain the main features of your website.

Home Page

- Hero banner
- Restaurant categories
- Featured dishes
- Special offers

Restaurant Page

- Restaurant listing
- Cuisine filter
- Rating filter
- Price filter

Menu Page

- Food images
- Food descriptions
- Prices
- Dietary tags
- Add to Cart

Product Details

- Ingredients
- Nutritional information
- Quantity selection
- Add to Cart

Shopping Cart

- Cart items
- Subtotal
- Delivery fee
- Tax
- Total amount

Checkout

- Delivery address
- Payment method
- Delivery time
- Place Order

User Account

- Profile
- Order history
- Saved addresses
- Wishlist

6. Learning Outcomes

Write what **you learned while developing the project**.

Example:

Through this project, I learned how to create and organize multiple HTML pages, style webpages using CSS, create responsive layouts, use JavaScript for interactive functionality, implement shopping cart operations, create forms, validate user input, and debug HTML/CSS/JavaScript errors.

7. Challenges and Solutions

This section is important because it shows your development experience.

Challenge	Solution
Hero section displayed incorrectly	Adjusted <code>.hero</code> and <code>.hero-content</code> CSS
Responsive layout problems	Used responsive CSS and media queries

Challenge	Solution
Managing cart items	Used JavaScript arrays/objects
Calculating total price	Implemented JavaScript calculations
Image not displaying	Corrected image folder paths
Multiple pages	Used common CSS and JavaScript files

8. Screenshots

Add screenshots of your actual project.

For example:

Figure 1 – Home Page

[Insert screenshot]

Figure 2 – Restaurant Listing

[Insert screenshot]

Figure 3 – Menu Page

[Insert screenshot]

Figure 4 – Product Details

[Insert screenshot]

Figure 5 – Shopping Cart

[Insert screenshot]

Figure 6 – Checkout Page

[Insert screenshot]

You don't need screenshots of every page. **5–6 good screenshots are enough** for a short project report.

9. Project Structure

Show your folder structure:

```
FreshBite/
|
└─ index.html
```

```
|— restaurants.html
|— menu.html
|— product.html
|— cart.html
|— checkout.html
|— account.html
|— login.html
|— about.html
|— contact.html
|
|— style.css
|— script.js
|
|— images/
|   |— hero.jpg
|   |— pizza.jpg
|   |— burger.jpg
|   |— biryani.jpg
|   |— ...
```

10. Conclusion

Finish with a short conclusion.

Example:

The FreshBite Online Food Ordering Website successfully demonstrates the use of HTML5, CSS3, and JavaScript to create a multi-page food ordering application. The project provides restaurant browsing, menu viewing, product details, shopping cart, checkout, and user account features. This project improved my practical knowledge of front-end web development and gave me experience in designing and implementing a complete website.
